TRUTHFULNESS AND COMPETITION

We have also heard the call from customers for sustainable products that come from companies with high social standards, preferably from Europe. European legislators are setting the bar ever higher for products, and national governments are following suit. Supply chain due diligence laws, regulations against greenwashing, product safety, and so on.

We deliberately refrain from making any statements about the sustainability, environmental friendliness or climate neutrality of our products. We do not want what we do with complete sincerity to be questioned by the imposed control of a greenwashing control authority, however it is designed.

That is what we stand for and you can rely on it 100%:

We select our products without exception according to the following criteria:

- › Clear, unobtrusive design for years of use
- › Longevity
- › Avoiding composite materials as much as possible
- › Recyclability
- › Product safety: tested according to the latest regulations
- › Production with high social standards: our producers have successfully passed BSCI, Sedex, ISO and similar audits.

What we do to minimize the negative impact of our products on the environment:

- › Sensible, minimal, plastic-free packaging ensures the protection of valuable resources and minimizes transport volume.
- › We make compensatory payments for the CO₂ produced in production and transport through our partner Nature Office. The individual footprint can be traced via a QR code on the packaging.
- › Strict quality control before, during and after the production process guarantees flawless goods, satisfied customers, the lowest complaint rates and little waste.

**THE CHOICE IS YOURS,
PLACE YOUR TRUST IN US!**

The right straw for every customer

Choose from our standard colors available from stock or let us produce your 100% matching custom color, which can be implemented from as little as 10,000 straws. Sounds like an incredible amount? But in fact, that's only 200 gastro boxes or 1666 sets of 6!

ENVIRONMENTAL PROTECTION STARTS WITH THE SMALL THINGS

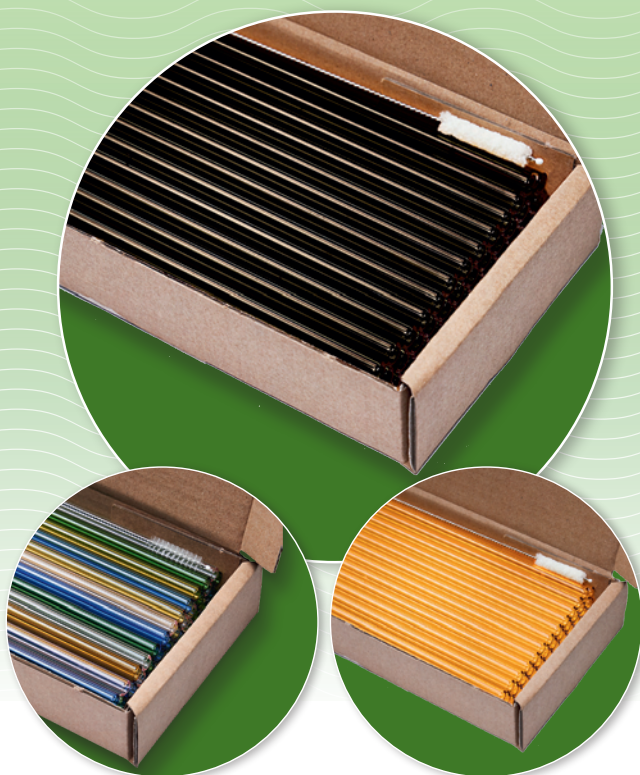

Reusable glass straws make an important contribution! The straws are made of 100% recyclable soda-lime silicate glass, are dishwasher safe, taste-neutral and equally suitable for hot or cold drinks. They are food-safe, BPA- and lead-free and made in Germany.

What is special about the straws from Nestler-matho is the almost endless variety of possibilities.

50er GASTRONOMY BOXES

with 50 straws and cleaning brush

50-er Gastrobox mit Reinigungsbürste

Larger quantities in a practical, simple packaging, especially for catering customers, of course with a price advantage. Drinking straws, 200 x Ø 8 mm, in crystal clear or 31 colors available from stock. **Advertising** on the drinking straws by laser engraving, 40 x 5 mm (50 x L6-1) or **food-safe screen printing**, up to 25 x 70 mm (50 x D6-1).

FOLDING CARDS WITH THE STRAWS OF YOUR CHOICE

in your personal design, with one or 2 straws, clear or coloured

Present your company, your idea or your message in the best light: double-sided printed folding cards in various punchings, with clear or colored, pure or refined drinking straws. **Advertising** on the straws by laser engraving, 5 x 40 mm (L6-1, L6-2) or **food-safe screen printing**, up to 25 x 70 mm, (D6-1, D6-2). Fold-out card made of 300 g offset paper, 4 pages, 4/4 color Euroscale, size 210 x 210 mm (open).

Example price for a fold-out card with one or two clear straws:

CUSTOMIZATION

LASER ENGRAVING

Effective, permanent advertising for every occasion.
Engraving class L6: up to 5 x 40 mm.

FOR EVERY CUSTOMER,
A SPECIAL DESIGN

FOOD SAFE PRINT

The screen printing inks we use are nationally and internationally certified according to §31 LFGB / USA-FDA guidelines / Proposition 65 (California) / Austrian regulation / French regulation. Guaranteed and certified dishwasher safe. Finishing class D6: up to 25 x 70 mm.

INDIVIDUAL PACKAGING

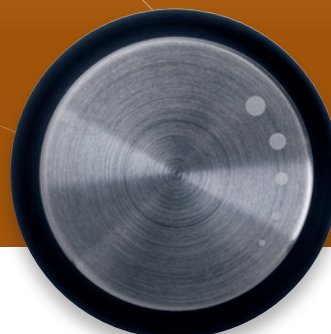

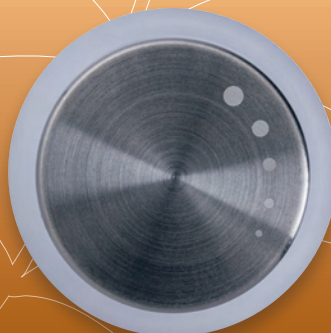

As individual as your CI.

"Colorful is my favorite color," said Walter Gropius. He would have loved our drinking straws. And not just because of the colors. Give your advertising message a personal touch with customized packaging. Talk to us about your ideas, and we will work with you to find the perfect solution.

FINISHING POSSIBILITIES AND TIPS

We can finish your products effectively with special lacquers and other finishing techniques to effectively in the limelight.

PAD PRINTING

**LASER
ENGRAVING**

**LASER
ENGRAVING**

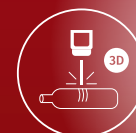

**SCREEN
PRINTING**

**DIGITAL
ROTARY PRINTING**

DIGITAL PRINTING

3D ENGRAVING

EXCERPT FROM OUR FINISHING OPTIONS

Laser engraving

Laser engraving with CO2 laser machines from Trotec. We use the fastest laser engraving machines on the market to significantly reduce delivery times, significantly.

3D engraving

Our Blue Line fibre lasers facilitate 3D engraving of large-area motifs on round bodies. We can therefore engrave workpieces with complex shapes on various levels, as well as bevels and curved contours for you without any significant distortions.

Digital rotary printing

The latest generation of digital LED UV rotary printing facilitates large-format printing on bottles and glasses, as well as full-circumference rotary printing.

Embossing

Deep and relief embossing produces fantastic results on leather, soft plastics and cardboard covers. Embossing can be performed blind or with a background colour. The option to emboss individual names using font suitcases is a special feature. This makes products unique and individual.

Digital printing

Digital technology is increasingly being used for printing small volumes and for motifs with colour gradients. The higher per unit printing costs are largely compensated by the lower preprinting costs here.

Pad printing

Pad printing is so precise that even the smallest fonts and contours can be produced with an excellent finish. We implement up to 6-colour solid colour motifs for you. A large number of basic colours is available, so we can mix any colour value based on RAL, HKS or Pantone specifications.

Do you have any questions about other finishing options? We are here to answer all your questions, advise you without obligation and help you make the right decision! Call us at **+49(0)7221-2154-0**.

pro 10 kg EXPRESS international	0.63 €/package

Worldwide shipping on request.

We will cover the costs of CO₂ neutralization in shipping.

Errors and printing errors excepted.

We make every effort to ensure that the prices printed in this catalogue will last for a year as it used to be. But facing increasing freight rates and raw material prices we feel unable to bear all the cost; it must be taken into account in the pricing. In such a case, we reserve the right to increase the prices within the runtime of a catalogue to be individually adapted. The relevant price is the price which you'll find on our website www.nestler-matho.de.
